

SRI LANKA'S MOST FOCUSED CONSTRUCTION,
INTERIOR PRODUCTS, POWER & ENERGY EXHIBITION

9TH EDITION

CONSTRUCTION POWER & ENERGY EXPO 2024

JULY 5 | 6 | 7 BMICH
COLOMBO

Introduction

Construction Power & Energy Expo is Sri Lanka's most focused construction, interior products, power and energy related exhibition. This Exhibition is held annually for the 9th Successive year at BMICH with participation of all leading stakeholders and key service providers within the building, housing, interior and Power Energy sectors.

The Power and Energy Industry in Sri Lanka plays a major role in the country's economic development and the well-being of its citizens. The industry encompasses the generation, transmission, distribution, and consumption of electrical power and various forms of energy.

Sri Lanka has been making notable strides in harnessing renewable energy sources. The government has set ambitious targets to increase the share of renewables in the energy mix, aiming to reduce greenhouse gas emissions and enhance energy security. Wind farms, solar power projects, and small-scale hydroelectric plants have been developed to tap into the country's renewable potential.

Over the years the exhibition has been a gathering place for consumers who are on the lookout for different facets related to these industries. Products and service providers related to the industry have found the exhibition to be the most potential and comprehensive platform to meet new customers, network, meet and exchange technologies and services among those present. These industry are booming heavily in Sri Lanka and we as organizers identified the need for such an event in this nation.
